Google Workspace Plan

Google Workspace is one of the most widely-used productivity applications in the world. With so much usage, comes great risk. That's why it's more important than ever to provide basic 3rd party monitoring of this key technology asset to protect your company's information.

The Google Workspace Security Plan monitors over 50 different events within the Google Workspace environment.

What types of events are monitored?

- Bad actors successfully logging in from outside approved locations

- Internal or external actors downloading excessive amounts of data from your environment

- Security policy changes to your accounts

- New devices added to your environment

- Admin Access Granted

Logo/Contact information will go here.

The Google Workspace Plan Includes:

Independent third-party monitoring of Google Workspace

Google Workspace activity report provided every month

Monthly meeting to review your Google Workspace account activity

Access to 365 days of event data to help diagnose issues and conduct forensics
(Google Workspace only provides 6 months of event data in their own environment.)

Real-time monitoring of events as they occur
