

ABOUT US

SMART
TECHNOLOGIES

Digital transformation changed the speed of work — but most workflows never changed.

As a result, people are now trying to run at the speed of technology instead of letting technology carry the workload. That's where frustration, rework, and burnout creep in — and where work stops being fun.

At **Smart Technologies of Florida**, we exist to fix that.

No matter the size of your organization, we partner with growing businesses to **eliminate Human Middleware** — the manual work, workarounds, and inefficiencies that happen when workflows through people instead of systems.

Our mission is simple: **Make Business Simple.**

Our purpose is bigger: **Glorifying God to fulfill every good purpose.**

We do this by redesigning how workflows through your organization using the right order:

DEVICES

TECHNOLOGY

PEOPLE

- **Devices** capture information cleanly and consistently
- **Technology** routes, secures, and automates the workflow
- **People** focus on decisions, service, leadership, and results — not busywork

When Devices and Technology are aligned, people get their time, clarity, and energy back. That's how we make work fun again.

SMART
TECHNOLOGIES

***Make Business Simple.
Make Work Fun Again.***

CORE SOLUTIONS

OUR PROVEN APPROACH

Educate → Integrate → Automate

We don't start with products — we start with understanding.

Educate – We assess where Human Middleware exists and identify workflow friction

Integrate – We connect devices and systems, so information flows cleanly

Automate – We eliminate manual steps and create predictable, secure workflows

The result is fewer errors, faster processing, improved security, and better experience for your team.

THE SMART DIFFERENCE

We don't just manage technology.

We redesign how work gets done — so your people stop acting as the system and start driving outcomes.

Business Process Automation

Turn manual, repetitive tasks into automated workflows that reduce rework, improve visibility, and help your business scale without adding stress.

Copiers & Printers (Smart Input Engines)

More than output devices. We transform MFPs into intelligent input engines that capture information once and launch automated workflows.

Managed IT Solutions

Reliable, secure, and proactive IT services that support your workflows — not slow them down.

Business Communications & VoIP

Unified communication tools that reduce friction, improve collaboration, and keep teams connected without complexity.

People & Organizational Performance

Targeted training and development that helps your team adopt better workflows, leverage technology effectively, and focus on
