VoIP Phone Systems

VOIP PHONE SYSTEMS FOR BUSINESS

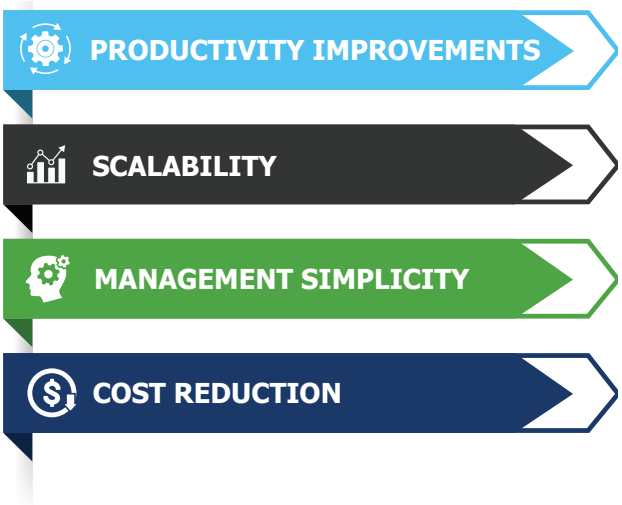

A VoIP phone system for your office may seem intimidating for those who have years of experience using a traditional system. It's understandable to hesitate to switch to an innovative IP telephony structure.

The latest VoIP technology phone systems proved all the traditional functionality through your existing in-house computer network. ABS can swiftly walk you through the new system and line out the short and long-term benefits of utilizing such a system for your office.

Innovation through a VoIP system can be one of the most important steps a business owner can take to improve business communications and productivity.

BENEFITS OF USING VOIP

Here are some common features you'll need to consider for a VoIP phone system.

What is a VoIP Digital Phone System?

Today's businesses are always trying to find ways to improve productivity and reduce costs. VoIP is one of those few implementations that can bring about both of those goals much more effectively than your traditional phone setups and IP telephony. This is a completely new way of your staff communicating with clients and customers and passing information that is vital for your growth as a company. This is the perfect solution for managing a mobile workforce that is always on the go or working remotely from home or various locations. And it doesn't matter if you have a 5-person office staff or a significant multi-location operation, ABS will assist in the design, build and support of your new VoIP phone system.

Copiers/Printers

We are your premier copier dealer in South Florida, and we deal with only the top name brands that include Canon, Copystar and HP. All of the brands we offer to our clients are well known for their operability and quality. Rather than go directly through the manufacturer for your office equipment, ABS can assist you with service requests and direct assistance that is right in your neighborhood. Stop trying to get your tech support through a phone with long wait times. ABS is ready around the corner to assist your office copier needs.

We can service and answer questions on more copiers. Some of our customers also have Canon, Kyocera, HP, Lexmark, or other brands of equipment. We will work extremely hard to be your only point of contact needed to get service on all the printers and copiers that are used by your staff.

BUYING AN OFFICE COPY MACHINE

Here are some common features you'll need to consider when buying an office copier:

- Letter/Legal or Tabloid? What is the biggest paper you'll copy? How often do you do Tabloid? Is this worth an extra expense? This is a difference in price between a letter/legal and a tabloid color copier.
- Print Quality – Does it just need to be business quality or should it be graphic designer quality?
- Pages per Month — How many pages should this color copier be able to handle per month?
- Brands — Any brands you love or want to stay away from?

We offer a vast array of color and monochrome copiers and multifunction devices.

PREMIUM DESKTOP PRINTERS FOR BUSINESS

The task of managing your printing fleet can be one of the biggest unmanaged expenses in your business. Choose the right printer and easily manage the devices in your network. Successful management includes consideration of the combination of toner and supply ordering to routine maintenance and repair. That is why we offer Managed Print Services to provide you with one, low-cost approach to complete printer and multifunction system management.

Our desktop devices will provide your business with high-performance output and that is because our products and manufacturers are proven with detailed reliability records. They are easy to manage, operate, maintain, and troubleshoot on a daily basis. With security being a concern, these units are built with security in mind to work inside your network and do so safely and privately.
