NEWS FOR IMMEDIATE RELEASE

BrevAll Technologies Wins Fastest Adopter Award at TAG Convention

Leader in Unified Communications Announces Award Win at Prestigious Ceremony

LOCATION — MAY 12, 2016 — BrevAll Technologies, a leader in unified communications, announced today the company won the “Fastest Adopter” award at the Technology Assurance Group (TAG Convention) in April of 2016. The prestigious event was held in Chicago, Illinois and was comprised of some of the brightest minds and thought leaders in the unified communications industry. Paul Enloe, Founder and CEO of BrevAll, was proud to accept this exclusive award which highlights a company that bettered virtually every area of its business in the name of heightening customer service and overall experience.

“It’s such a pleasure to be recognized for an award like this,” states Enloe. “The reason I’m especially proud is because it’s a reflection of how outstanding our team is at implementation. In our industry, it’s easy to make big promises. The real value is in what you actually deliver.” BrevAll is a Member of TAG, an international organization of independently owned unified communications companies that collectively represents nearly \$350M in products and services. BrevAll’s participation in the TAG organization is a way for them to remain consistently ahead of their competitors, gaining access to best practices, future trends and innovative ways of improving customer experience.

In order to win this award, BrevAll had to implement a wide array of new programs in a

timely fashion. Within 12 months, BrevAll implemented customer service improvements, educationally based technology marketing campaigns, creative financing arrangements to get their customers access to leading edge technology, and did so without the prohibitive capital expenditures and much more.

“Paul is a high-performing individual and he holds his team to that same high standard,” states Dale Stein, co-founder of TAG. “His business has grown significantly through his commitment to taking action and that’s what happens when you raise your standards. As a CEO it’s so easy to get caught up in the trivialities of day-to-day operations, but it takes a true leader to keep the team focused on what’s actually important. This is what his company is dedicated to enabling in others. We hope that other members of the organization see his performance as an aim to strive for.”

BrevAll is a provider of enterprise-grade, unified communications solutions to small to mid-sized businesses.

ABOUT BREVALL TECHNOLOGIES

BrevAll Technologies, Inc, formerly Telecom-911 dba DIAL Communications, is a privately owned, Texas based technology provider and service company with national distribution capability. BrevAll has held a strong reputation in the business community over the past 28-years by focusing on customer-centric solutions and by connecting businesses to advanced technologies. During recent years, BrevAll has added more end-to-end technology capabilities to its portfolio beyond IP telephony that now includes Data Security & Networks, Surveillance, Hosted IP Telephony, Video Conferencing and Repair & Refurb Services. Whether remanufactured or cutting edge systems and parts, BrevAll provides value-added service with on-site, quality-controlled repair and warehousing facilities.
